search:
6 steps

Introducing the «Big O» Notation

Introducing the «Big O» Notation

Trend

Estimate the Runtime Performance

«Big O» for Data Transfer

1-hour drive

Internet

Transferring Big (~100 GB) Files

Internet Speed

5 Mbps

0.4 Mbps

Transferring Big (~100 GB) Files

Download: 5 Mbps
Size: 100 GB

+50 Hours

1-hour drive

Data Transfer Algorithms

«Big-O» of Data Transfer Algorithms

$O(1)$

Constant time
Independent of data size

Linear
Proportional to data size

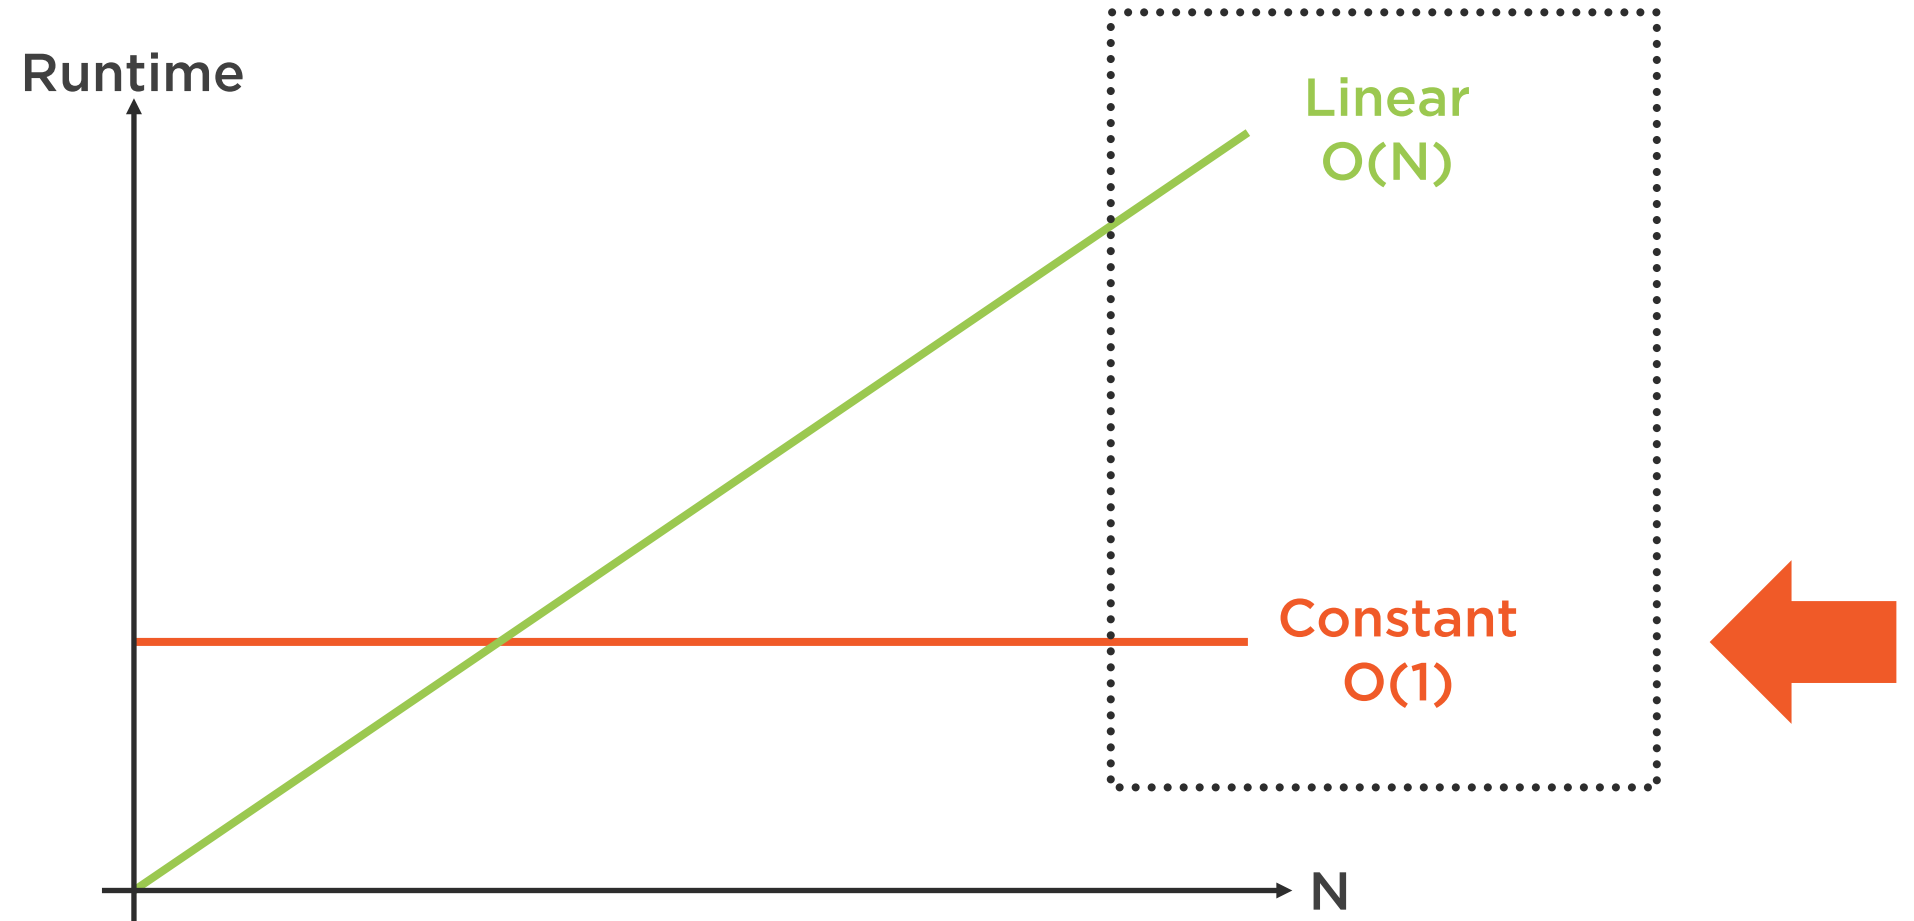

$O(N)$

Linear vs. Constant Complexity

Linear vs. Constant Complexity

Linear vs. Constant Complexity

Asymptotic
 $N \geq 1,000,000$

«Big-O» → Trends

Cache-friendly?

Binary Search

11	22	33	64	77	80	88
0	1	2	3	4	5	6

80

Just *two* steps

Binary Search

Progressively **cut**
the problem space
(array) *in half*

Binary Search

$O(\log(N))$

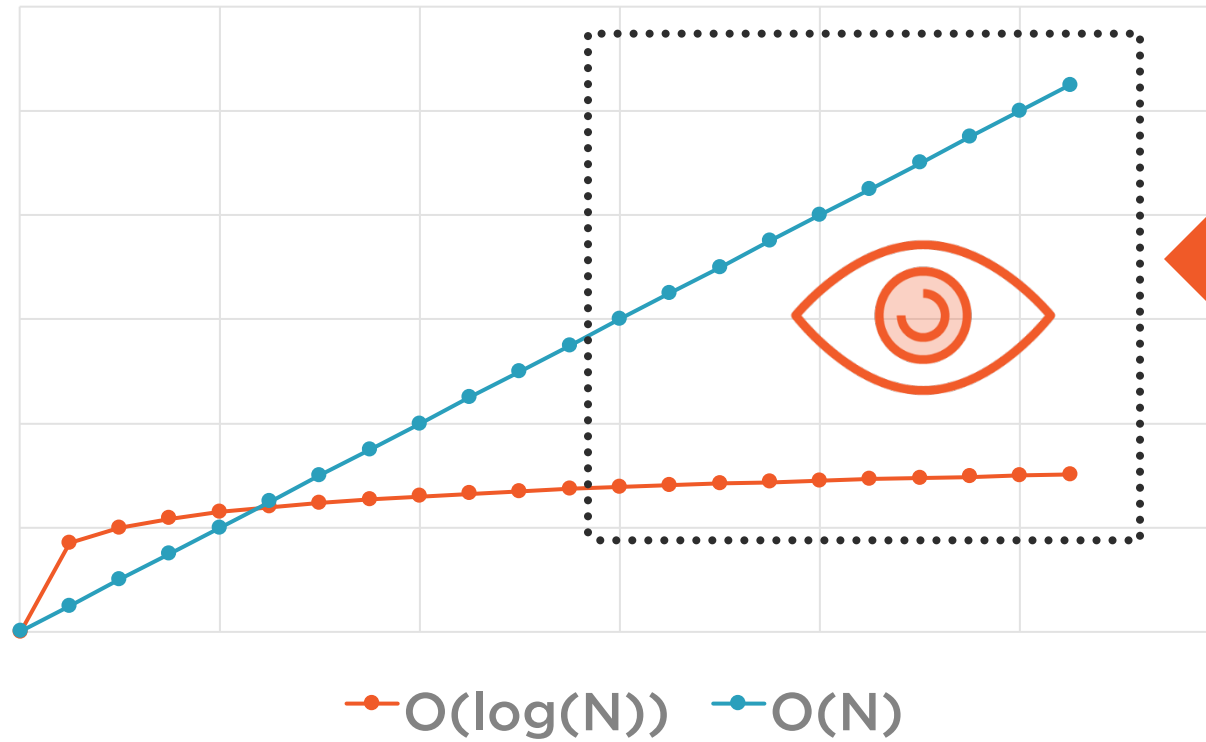

Halve
problem
space

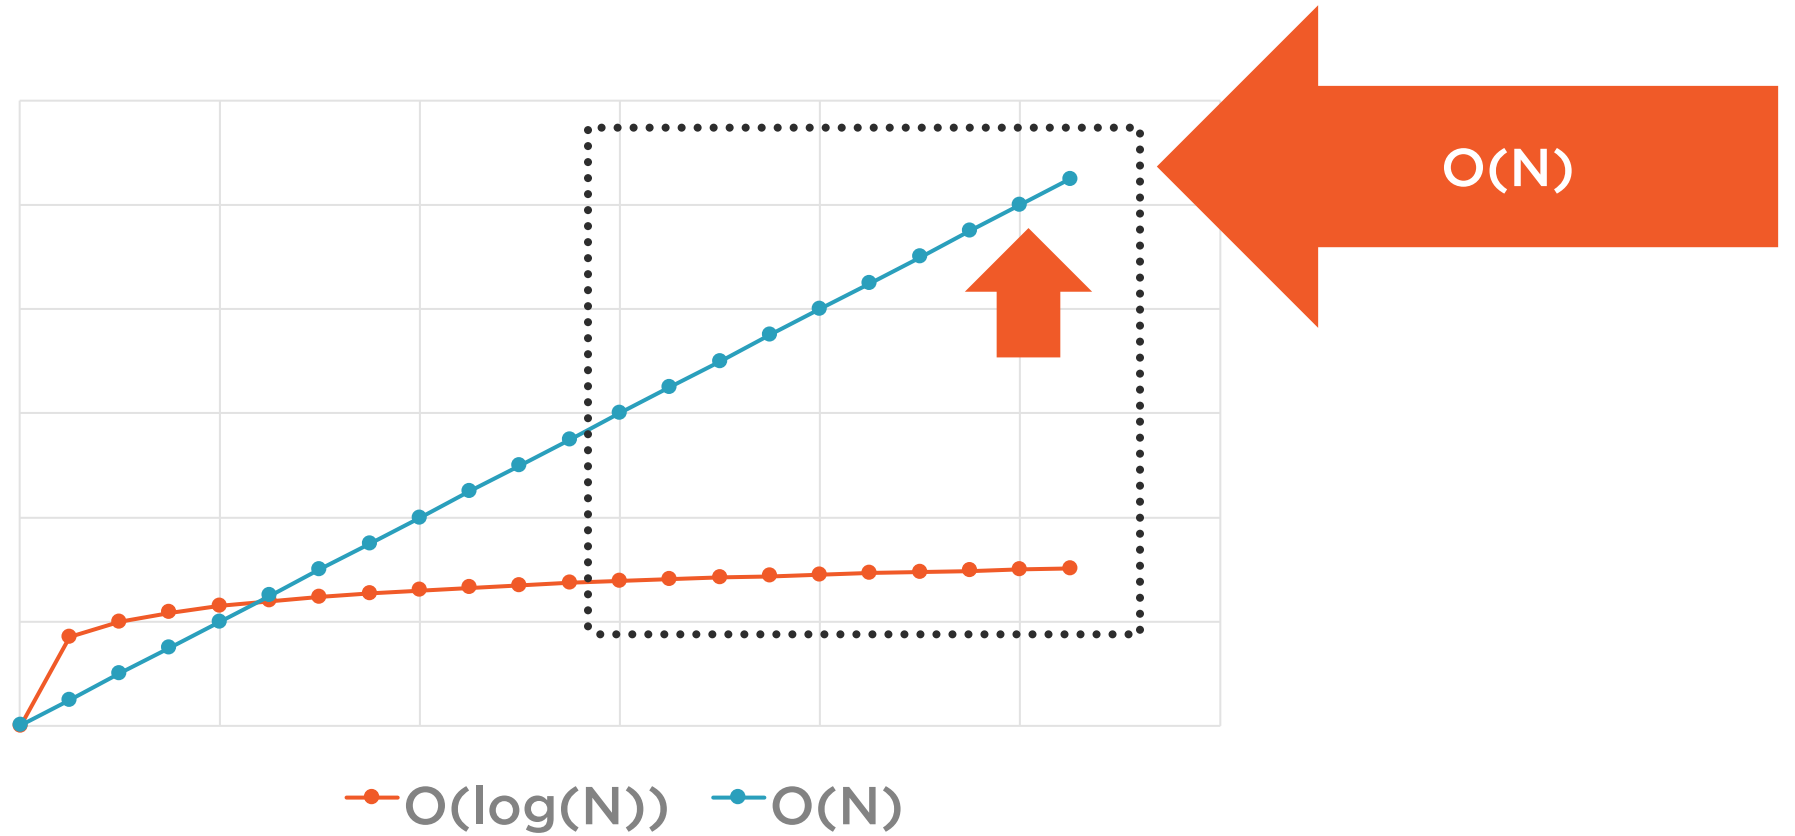

Asymptotic Analysis
